Mar 05, 2020

Contents

1	Introduction:	1
2	Requirements	3
3	Installation Procedure	5
4	Working modules	7
5	Planned Modules	9

CHAPTER 1

Introduction:

django-blog-it is simple and completely customizable blog application. You can integrate it into your project and customise the blog application or just host it to post your articles.

Source Code is available in MicroPyramid Repository(<https://github.com/MicroPyramid/django-blog-it.git>).

Modules used:

- Pillow
- Django Simple Pagination

CHAPTER 2

Requirements

Python	>= 2.6 (or Python 3.4)
Django	= 1.9
jQuery	>= 1.7

CHAPTER 3

Installation Procedure

1. Install django-blog-it using the following command:

```
pip install django-blog-it

(or)

git clone git://github.com/micropyramid/django-blog-it.git
cd django_blog_it
python setup.py install
```

2. After installing/cloning this, add the following settings in the virtual env/bin/activate file to start discussions on blog articles

```
You can create/get your Disqus account at https://disqus.com/profile/login/
# Disqus details
DISQUSSHORTNAME="Your Disqus Short Name"
export DISQUSSHORTNAME
```

3. Use virtualenv to install requirements:

```
pip install -r requirements.txt
```
